

CURL CLINIC+™

EDUCATION

Tea-Infused Formulations

Founded by Denis DaSilva in Brazil – built by stylists, for stylists. Curl Clinic's proprietary. **Triple Tea Complex™** — composed of anise, chamomile, and peppermint tea extracts — helps create an optimal scalp environment for healthier hair growth.

What this class will teach you

This class is designed to shift mindset, elevate confidence, and empower stylists to become educators behind the chair. Explore the evolution of the curl movement, Denis's professional journey, and a holistic understanding of hair and scalp as one system.

Stylists will learn how to **read curl patterns, hair types, and scalp conditions**, then translate that knowledge into real salon results. The class also reframes retail as an educational tool—building trust, improving client outcomes, and increasing income.

The **live demonstration of Denis's latest curl cutting technique** will focus on customization, shape, movement, and longevity. Attendees will gain insight into the CURL CLINIC+ philosophy, rooted in scalp-first care and the use of teas and essential oils to support healthy hair from the root.
