		<p><b>Skin:</b> If signs of irritation to the skin develop, wash the affected area with plenty of water and soap. Seek medical attention in the event of an adverse reaction or if symptoms persist.</p> <p><b>Inhalation:</b> If respiratory distress or irritation occurs, remove victim to fresh air. Seek medical attention in the event of an adverse reaction or if symptoms persist.</p>
4.2	<b>Most Important Symptoms and Effects, Both Acute and Delayed:</b>	Spraying directly in the eyes may cause slight irritation, transient redness and discomfort. Intentional misuse by deliberately concentrating and inhaling the contents may cause nausea, vomiting, and signs of central nervous system depression (headache, dizziness, and drowsiness), and rapid suffocation by displacing oxygen.
4.3	<b>Indication of Immediate Medical Attention and Special Treatment Needed:</b>	Provide general supportive measures and treat symptomatically. No known specific antidotes.
